

ALSAFLOOR 2018 COLLECTION

LAMINATE & ENGINEERED WOOD

by

Furniture, Flooring, Worktops

3 industrial activities

Edito

Alsapan is a French company, founded by Alsatian carpenter Joseph Strub, in 1972. He was one of the first to understand the potential of mass-produced furniture

Joseph's grand-daughter, Cécile Cantrelle, took over as head of the company in 2014.

Millions of kit-furniture units, splashpanels and worktops and millions of square metres of laminate flooring are manufactured in the company's plants each year and exported throughout the world.

Key to Alsapan's success and the efficiency of its three business lines is the ongoing investment in innovation and production facilities. In 2018, the company will be taking delivery of a new vinyl flooring production line, which will help broaden and increase our market presence worldwide.

The 2018 version of our Alsafloor catalogue features 6 new patterns, in both contemporary (539 Sand, 541 Coco oak, 542 Aronia oak, 543 Honey oak) and original (538 Batik, 540 Inside, 544 Wood stain oak) styles. You will find there the full range of our laminate flooring and parquet products and we are sure you will also enjoy looking at our 2018 vinyl catalogue.

We hope we will soon be able to include you among our favoured customers.

Cécile Cantrelle, Président / **Antonio Clemente**, CEO

Worktops and splashpanels

Furniture

Laminate, Vinyl & Engineered wood

Made in
France

Manufacturer
since **1972**

Ongoing
innovation

**An ecologically-
responsible French
laminated manufacturer.**

All Alsapan flooring products are PEFC™ certified. The wood used in our flooring is sourced from sustainably-managed forests - we never use exotic woods or wood from tropical forests. Our production facility is geographically close to our raw material suppliers and retail outlets, which allows us to reduce shipping distances and CO2 emissions.

Our Marlenheim facility is exemplary in its environmentally-responsible actions, which help maintain our planet's natural resources:

- Its roof is fitted with solar panels.
- Employees are actively seeking to reduce paper consumption.
- While the plant uses production waste products as an energy source for heating the buildings and the machines.

**A+,
for a healthy habitat!**

Introduced on 1 January 2012, the health safety labelling on product packaging gives consumers details of the amount of volatile substances released into the interior air by flooring and is ranked on a scale from Class A+ (very low emissions) to Class C (high level of emissions).

ALSAFLOOR is ranked A+, with a formaldehyde emission rate of under 10 µg/(m² x h), based on tests performed by an independent laboratory.

*Information as to emissions of volatile compounds in the indoor air, which might be harmful to the health when inhaled, on a scale from Class A+ (very low emissions) to C (high emissions).

Laminate collection

P. 4 to 41

Choosing laminate flooring means choosing flooring which looks good in any room and which is designed for all home and business uses.

This year sees the addition of 6 new patterns to our range of classic and contemporary designs.

(1) WP : Water protect
(2) Blue wool scale part B02 ≥ 6. Grey scale, part A02 ≥ 4.
(3) EC marking declaration of conformity available on request on our website. All our products comply with the EN 14041:2004/AC:2006
(4) Our products are made from wood taken from sustainably managed forests.
(5) Information as to emissions of volatile compounds in the indoor air, which might be harmful to the health when inhaled, on a scale from Class A+ (very low emissions) to C (high emissions).

Surfaces structures

Rustic texture

A discrete raised pattern produces a cosy, rustic effect.

In-Registered texture

A raised surface that appears to follow the wood veins of the pattern and produces an effect of authenticity.

In-Registered satin-finish

A high definition, in-registered structure.
An outstandingly realistic imitation-wood design, with a contrasting glossy and matt satin-finish surface!

In-Registered texture heliochrome

A mat / glossy effect (mat on the surface and glossy in the wood grain) for a deeper and more noticeable structure.

Stone

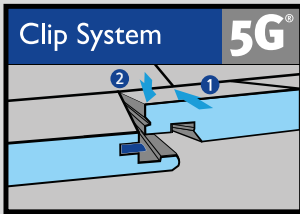

A stone texture specially design for tile dimension.

Matt wood structure

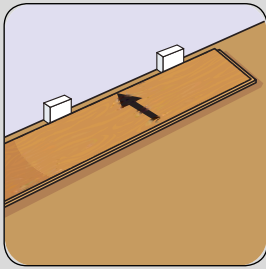

A soft, velvety matt look and feel.

Clip systems

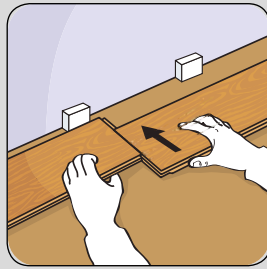

5G®: A new clip system that simply locks the planks together.

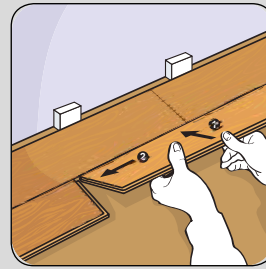

The 5G® locking system enables a significantly fast and easy installation. A reinforced plastic tongue on the short side of the floor panel results in a strong and robust locking, emitting a "click" sound and locking the planks vertically.

4

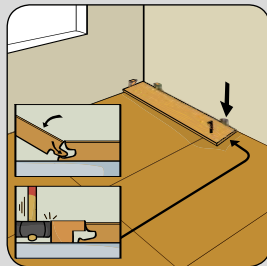

CLIP A

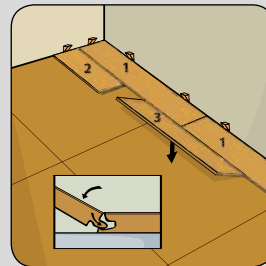

A tried and trusted assembly system, where the groove is inserted lengthways at an angle over the tongue and then moved downwards. A slight tap with a hammer and a wooden block and the short side clicks into place to form a perfect seal.

...and pictograms to make life easier!

4 bevelled edges on each board

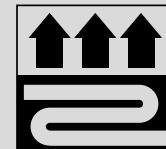

The boards are bevelled lengthwise and widthwise to produce an authentic look of the flooring of yesteryear. The joints are lacquered for easy cleaning and optimized tightness.

Special protective features

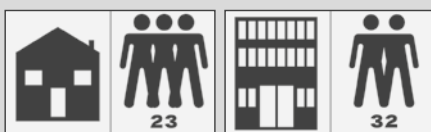

The wax layer on both sides of the joint creates a seal and prevents water ingress.

Special underfloor heating

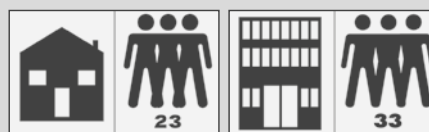

Suitable for laying with underfloor heating.

Classes of use

Heavy domestic and general commercial use.

Heavy domestic and heavy commercial use.

The EC symbol on all our products certifies that they are produced in compliance with currently-applicable standards and that they can move freely between countries within the European Community.

Collection Vinyle

This year, Alsapan is installing a brand-new production line for rigid 5.5/0.30 vinyl flooring. Vinyl has the same rigidity as laminate flooring, and shares similar features and benefits to flexible vinyl flooring, but with a number of additional advantages:

- underlay built into the plank
- highly durable
- pleasant feel
- excellent walking comfort
- heightened acoustic insulation
- very good thermal insulation
- low maintenance
- compatible with rooms with a high moisture content

This new product, a central part of our collection, is more rigid, lighter, easier to fit and features a plastic compound base. The wide range of patterns for our flexible and rigid vinyl flooring make the Alsapan collection a genuine focal point for your home decoration.

The accessories

Don't forget the accessories, essential for laying down Alsapan floorings!

Necessary for installation, we offer **underlays** to level the base floor and for acoustic and thermic insulation.

Coordinated with each **flooring design, squirting and profiles** bring the finishing touch that will make the difference.

Additional accessories:

They ease the installation process.

For more information please see our **accessories** catalogue.
