

TEA MAKER & WATER KETTLE

The individual pleasure of tea

Precise temperatures for preparing tea & hot water

ROMMELSBACHER

This tea maker & water kettle stands out by superior workmanship, elaborate features and exclusive materials. Jug and base unit have an appealing design and are made of easy-care, break-proof glass. Thanks to the 360°-base the appliance suits left- and right-handed persons. Another special feature is the operation through fast, illuminated touch sensors with a well-arranged LED display. Furthermore the appliance scores with 5 programmes for tea, which can be adjusted individually in temperature and steeping time. A separate programme with temperature selection is meant for heating water. And there is a separate quick-start button for using the unit as a water kettle, so that water for baby food etc. is brought to the boil without any prior adjustment and programming. For preparing tea, choose a brewing temperature from 50 – 100 °C. The steeping time can be set up to 10 minutes. Whether black tea, green or white tea, whether teas made of fruit or herbs – thanks to the precise temperature accuracy (direct temperature measurement of the content) the appliance delivers best results to match every taste. Just fill in water, select the programme matching your tea type and, if required, adjust temperature and steeping time. The appliance will continue by itself now. Once having reached the set temperature, the signal tone of the unit will prompt to insert the tea infuser. And once the steeping time has run off, another signal tone indicates that the tea infuser has to be removed. The automatic keep-warm function just rounds off the pleasant handling. Demanding tea drinkers and all those who often require hot water, will love this superior ROMMELSBACHER appliance!

Technical data:

- Type: TA 2000
- 230 V~ 2000 W • stainless steel/glass
- operation via touch control sensors, LED-Display
- 5 tea programmes with individual adjustment possibilities (temperature/steeping time) and memory function
- 1 programme with temperature selection for heating water
- quick-start button (100 °C) for boiling water
- electronic temperature regulation 50 °C – 100 °C in steps of 5 degrees
- steeping time extendable up to 10 minutes
- 30 min. keep-warm function
- high-quality jug made of heat- and shock-proof Borosilicate glass (usable volume 1.2 litres)
- fine mesh stainless steel tea infuser, removable
- base unit with high quality glass surface
- 360° base unit – glass jug can be placed all around, ideal for right and left handers
- dimensions (w x d x h): 17 x 23 x 28 cm
